

Luis Pedraza

SENIOR FULL-STACK ENGINEER

luis@luispedraza.org linkedin.com/in/lspdrz luispedraza.org

SKILLS

Languages TypeScript, JavaScript, Python, Ruby, PHP, SQL, R
Frontend React, Next.js, React Native, Vue, HTMX
Backend Node/Express, NestJS, GraphQL, Rails, Django, WordPress, TypeORM, PostgreSQL, Pandas
Infra AWS, Docker, Heroku, DigitalOcean

EDUCATION

University of Texas at Austin
BA, Philosophy
Minors: Computer Science, Government
2013 – 2017

EXPERIENCE

Freelance · Independent Software Engineer

Sep 2024 – Present

Full-stack web development contracts

- Built frontend apps for clients using Next.js and React, from design through deployment
- Helped build a social network for US journalists to share articles easily, working on the Django web app with HTMX templates and a WordPress plugin

Maisha Meds · Senior Software Engineer

Sep 2022 – Sep 2024

Software for independent health facilities in East Africa

- Led a team of three engineers that built an inventory web app from scratch using Rails, Vue, and TypeScript
- Architected the data schema, SQL queries, and API endpoints to serve large amounts of inventory data
- Designed and implemented an anonymization service that deleted personal user data while retaining important sales and donation metrics
- Defined quarterly and annual engineering OKRs with company leadership

Ameelio · Software Engineer

Jan 2021 – Feb 2022

Free video calling and messaging for incarcerated people and their families

- Designed and built an Express/GraphQL/TypeORM API for scheduling, approving, and hosting video calls, with a Jest test suite
- Engineered a synchronization system to move user accounts and permissions from external sources into the PostgreSQL database
- Overhauled both frontend clients to use GraphQL instead of REST and Apollo Cache instead of Redux, while shipping new features weekly

Nearpod · Software Engineer

May 2019 – Aug 2020

Interactive lesson platform for K-12 teachers and students

- Built features for a new slide-based, interactive learning app in TypeScript (React and NestJS) within a distributed microservices architecture
- Developed the backend and frontend for a customizable marketing banner on the company's Django/React app

Data Drum · Lead Developer

Jun 2018 – May 2019

Economic and social data platform

- Designed and built an API in Express that served Data Drum's economic and social data to clients
- Developed a Python scraping system that continuously collected data from over 100 diverse sources
- Built a mobile app in React Native and TypeScript that presented Data Drum's data visually

VOLUNTEER

Triangle · Data Scraping

Dec 2020 – Feb 2021

- Wrote an automated script that scraped data from Lebanon's commercial registry website and added it to a database accessible through the Django Admin interface
- Wrote a script that crawled the Facebook pages of multiple Syrian news outlets and added the content to a Google Sheet used for gender analysis of post-war Syrian media
